

SYMPOSIUM – TECHNICAL EVENT – ANALOG ARENA

Organized by: Department of Electrical and Electronics Engineering

Venue: ECE Circuit Lab

Level: Symposium Technical Event

1. Event Overview

Analog Arena is a hands-on analog electronics competition where participants transform circuit diagrams into working hardware under real-time constraints. This event challenges students to demonstrate their understanding of component selection, breadboard implementation, output measurement, and performance optimization.

2. Event Nature

- **Type:** Technical Event
- **Category:** Analog Circuit Design & Implementation
- **Format:** Multi-Level (Component Selection + Circuit Building + Constraint-Based Design)

3. Event Objectives

- To test practical knowledge of analog electronic circuits.
- To enhance hands-on circuit building and debugging skills.
- To bridge theoretical learning with real-time implementation.
- To develop analytical thinking under time constraints.
- To encourage teamwork and precision in engineering tasks.

4. Team Composition

- Each team must consist of **2-3 members**.
- Participants must have basic knowledge of analog circuits.
- Inter-college teams are allowed.
- Individual participation is not permitted.

5. Registration Details

- Registration will be accepted on a **first come, first serve basis**.
- A maximum of **20 teams** will be allowed to participate.
- Teams must register before the specified deadline.
- Team members cannot be changed after registration.

6. Event Rules & Guidelines

- The event consists of multiple rounds.

Round 1: Participants identify and collect correct components based on a provided circuit diagram.

Round 2: Teams assemble the circuit on a breadboard using collected components.

Round 3 (Advanced/Qualifier Round): Teams modify circuits to meet specified electrical constraints.

- Only provided components may be used.
- Judges must verify the circuit before power supply connection.
- Any short circuit or unsafe wiring must be corrected before testing.
- Mobile phones are not allowed during active competition.
- Teams must report 30 minutes prior to the event.
- Exceeding time limits will result in negative marking.
- The jury's decision will be final and binding.

7. Judging Criteria (Total: 100 Marks)

Criteria	Description	Marks
Component Selection	Correct identification of values and ratings	20
Circuit Accuracy	Proper wiring and polarity	20
Output Precision	Accuracy of measured output	20
Constraint Satisfaction	Ability to meet given electrical limits	20
Neatness & Layout	Clean breadboard assembly	10
Time Efficiency	Completion within allocated time	10
TOTAL		100

8. Event Timings

Time: 10:00 AM – 3:00 PM

9. Safety & Compliance

- Participants must wear closed-toe footwear.
- Hands must be dry before handling electrical equipment.

- Short circuits and unsafe wiring are strictly prohibited.
- Participants are responsible for proper handling of lab equipment.
- Emergency exits must remain unobstructed.
- Any misconduct or rule violation will result in disqualification.

10. Expected Outcomes

- Strengthens practical understanding of analog electronics.
- Enhances debugging and analytical thinking skills.
- Builds teamwork and time management abilities.
- Provides real-world circuit design exposure.

11. Event Coordinators

Event Heads:

1. M. LOKESH
2. R. VAISHNAVI

12. Event Communication
